

MUHAMMAD UBAID

Artificial Intelligence Student | Aspiring Software Engineer

+92 332 316 3610 • Karachi, Pakistan • [LinkedIn](#) • [GitHub](#)

EDUCATION

BS Artificial Intelligence

Dawood University of Engineering & Technology
2024 – Present | 4th Semester
Karachi, Pakistan

CGPA: 3.32 | LAST SEMESTER GPA: 3.49

TECHNICAL SKILLS

Languages

Python • C++ • JavaScript • SQL

AI / ML

Machine Learning • Deep Learning • NLP • LangChain • OpenCV

Frameworks & Libraries

TensorFlow • PyTorch • Scikit-learn • NumPy • Pandas • Matplotlib

Tools & Platforms

Git • GitHub • VS Code • Jupyter • Google Colab • Linux

Web Basics

HTML • CSS • Flask • React

SOFT SKILLS

Problem Solving
Team Collaboration
Communication
Time Management
Adaptability
Critical Thinking

COURSEWORK

Data Structures & Algorithms
Artificial Intelligence
Machine Learning
Computer Vision
Natural Language Processing
Database Systems
Object-Oriented Programming
Probability & Statistics
Linear Algebra

PROFILE SUMMARY

Motivated 4th semester BS Artificial Intelligence student at Dawood University of Engineering & Technology with a strong passion for building intelligent systems. Proficient in Python and key AI/ML frameworks, with hands-on experience in academic and competition-driven projects. Eager to contribute to real-world software development and AI solutions through a challenging internship at a software house.

ACADEMIC PROJECTS

Data Structures & Algorithms

C++ Coursework

- Implemented sorting and searching algorithms (QuickSort, Binary Search)
- Analyzed time complexity and optimized performance

Database Systems

SQL Coursework

- Designed normalized relational schemas for sample applications
- Wrote queries for CRUD operations and joins

Object-Oriented Programming

Java Coursework

- Built small-scale applications demonstrating encapsulation, inheritance, and polymorphism
- Applied design principles for modular, maintainable code

TECHNICAL PROJECTS AND DEPLOYMENT

[SMS Spam Detector](#)

- Built a machine learning classifier for spam detection using Naïve Bayes and logistic regression.
- Achieved high accuracy in distinguishing spam vs. legitimate SMS messages

[RaahIQ — AI-Powered Smart Commute Planner](#)

- Developed an intelligent commute assistant that predicts travel times and suggests optimal routes.
- Integrated real-time traffic data and machine learning models to improve daily travel planning.

[AhqameSharyat — Islamic Study App](#)

- Designed a multilingual app providing tafseer, verse browsing, and AI-powered Q&A.
- Built with Flask + React, enabling interactive and accessible study of Islamic texts.

[Resume Analyzer — AI Career Tool](#)

- Built an NLP-based system to parse resumes and match them with job descriptions.
- Implemented keyword extraction, skill-matching, and scoring to highlight strengths and gaps.
- Deployed with Flask + React, enabling interactive recruiter/student use.

CERTIFICATIONS & EVENTS

Microsoft — Transform Ideas into Action with Copilot Chat

Certificate of Completion • March 2026

PROCOT'26 — LangChain Mysteries

Certificate of Participation • JS Bank PROCOT 2026

3rd International Conference — Navigating the Barriers: Interdisciplinary Value of AI

Attendee • Dawood University of Engineering & Technology
